

ATTACHING BLOCK ELEMENTS TOGETHER WITH LEE MONROE

- Sew block elements oversized and then cut down after sewing for accuracy.
- For HSTs, keep the seam in the corner to get perfect points when attaching.
- When trimming, keep points ¼" away from the edge to set yourself up for success in later seams.
- Alternate pressing seams for great nesting and easy perfect points.
- Use pins when attaching seamed pieces together.
- When joining HSTs, start sewing in the middle of the seam and then out to each corner for cleaner corners.
