

LOG CABIN BLOCKS WITH ROSSIE HUTCHINSON

- This traditional block can be made modern by using different fabrics and fabric placements.
- Traditionally, these blocks have a red center representing the hearth and warmth of home.
- To change the look of your log cabin block, substitute a different shade or color for one or two “logs”.
- As you put your log cabins together, you can rotate the blocks to create secondary designs.
- You can use the log cabin as the basis for improvisational piecing as well.
