

## IMPROV — PUTTING IT ALL TOGETHER WITH ROSSIE HUTCHINSON

- Find a block or unit that can become your standard for all or many of your units.
- Measure your units against that standard, and identify places you need to add more fabric.
- Where you need to add segments on, add those in different places to allow them to blend in.
- Consider floating your improv pieces in negative space - use a design wall to arrange them!
- Use yarn or pins to represent the major seams as you plan your quilt top on the design wall.
