

## COLOR THEORY WITH STEPH SKARDAL

- A color wheel can be a really helpful tool as you design your quilts.
- Complementary colors are opposite each other on the color wheel.
- Triadic colors make a triangle across the color wheel.
- Use the fabrics you have on hand to mimic the color wheel placement - this can be a great tool during the design process.
- Neutral colors don't have an obvious place on the color wheel.
- Analogous colors are close to each other on the color wheel.
