

## SCANT 1/4" SEAMS WITH LEE CHAPPELL MONROE

- If you don't have one, find a 1/4" foot for your sewing machine!
- You can choose a foot with or without a physical guide.
- A scant 1/4" is one-quarter inch of space minus the width of one thread.
- You can use a magnetic guide on your stitch plate to get your 1/4" seam.
- Use a trolley key or stylus to protect your finger when manipulating fabric near the needle.
- Let the feed dogs and presser foot on your machine do the work!
